Statistics for Management

David S. Rubin, Sanjay Rastogi, Masood Husain Siddiqui Richard I. Levin : Statistics for Management before purchasing it in order to gauge whether or not it would be worth my time, and all praised Statistics for Management:

Statistics for Management is a comprehensive textbook designed to help students understand the statistical concepts and applications used in business and management situations. As in case of the earlier editions, this edition too omits complex notations in favour of graphic and verbal explanations and aims to explain the subject with a practical orientation. Examples from the real world are discussed to explain how the textbook principles work in professional practice. Written in a simple and lucid language, this book is an excellent resource for students pursuing management

courses.
